“ “ County of Rockingham,	127 62	
“ “ Town Treasury,	572 88	

upon the subject to your committee, they made no opposition to the continuance of the teacher, and the school accordingly proceeded to its close. Miss Page is a young lady of much promise. She is an excellent speller — a beautiful reader — well versed in grammar and geography ; but is not qualified to teach the higher branches of mathematics ; but has a very respectable knowledge of arithmetic, and passed upon the whole a good examination. The scholars in this district excel in good behavior. It is refreshing to see their good order and the respect generally paid to their teachers. Such children honor their parents.

#### DISTRICT No. 1. — WINTER TERM.

For the Winter Term in this district, Mr. Geo. J. Judkins was employed. His success as a teacher is proverbial — no infelicities ever attend his efforts — he is a *model* teacher, and a young man of great promise. He had an easy school to govern, and nothing occurred, to mar the harmony of parents, children or teacher.

#### DISTRICT No. 2. — SUMMER TERM.

The school in this district was, in the Summer, under the instruction of Miss Annie L. French, a young lady of pre-eminent literary qualifications. Difficulties of a very trying character she had to encounter — but she lived through them, and satisfied your committee, that if the scholars did not learn, the fault was not hers, but belonged elsewhere.

#### DISTRICT No. 2. — WINTER TERM.

The Winter Term (only 8 1-2 weeks) was taught by your committee. The scholars generally treated me with much respect and kindness, and while the weather was favorable for the children to attend, they learned very fast. The character of this school would, in a short time become elevated, if a few in the district would suffer their wonderful acumen for one term, to remain in a torpid state.

## DISTRICT No. 5. — SUMMER TERM.

The Summer Term in this district was taught by Miss M. B. Libbey, of Epson, a teacher of much merit. The children were, in most respects, kept orderly, and gave abundant evidence of good improvement. Miss Libbey has great presence of mind, and is not to be overcome by difficulties—in school her word is law — “she says what she means, and means what she says.” She gave good satisfaction.

## DISTRICT No. 6. — WINTER TERM.

The Winter Term here was taught by Mr. D. B. Fitts of Fremont, a young man of excellent character, so far as known, and who acquitted himself satisfactorily in his examination. Mr. Fitts strove hard to keep order, and will in this respect, no doubt, hereafter, make some improvement. Parents, if they wish to have good order in school, should command obedience at home; and influence the minds of their children to respect the authority of their teacher; by such influences, their offspring will be likely to win coronary glory and literary fame. Some in this district excel in scholarship.

The only new books I have recommended are Eaton's Arithmetic, and Wells and Quackenbos' Grammar, also the continuation of Tower's Grammar, Colton's and Fitch's Geography, and the Progressive Speller.

Three of the schools in town viz.:—No. 1, No. 2, and No. 3, were visited by Mr. Henry L. Boltwood, the County Commissioner, with your committee, Dec. 16, 189. The Commissioner gave a most excellent lecture on education in the evening at the Town Hall.

## REMARKS.

Young ladies and gentlemen should not go on the principle of getting short lessons in school, and those half learned; but should task themselves liberally and commit perfectly — make a clean sweep — learn all the different sounds of the vowels and consonants—let everything be done systematic — let your orthography be perfect, i. e. simple and philosophic. Let Webster be the standard of your orthoëpy. Study carefully “Town and Holbrook's Progressive Speller.” Secure your Alma's and Inkerman's, your Magenta's and Montebello's — then the Malakoff's and Solferino's will all fall before you. Let me repeat the idea — be a good speller — a good writer — a good reader — a good grammarian — a good geographer — a good historian, understanding well the principles of common arithmetic and political economy — then the higher branches are more than half conquered.

The light literature of our age, together with algebra, are poor stones for the foundation of a good education; although the latter often makes a beautiful keystone for the arch of the temple of knowledge. Children while learning should have a chance often to inflate their lungs with fresh air. When too young to study without the direct assistance of the teacher, their time might as well be spent in driving a hoop, or playing hide and go seek, as to be in the school room, where no other principle but cruelty can keep them in order; and I think much better. While acquiring an education, children should have all kinds of exercise; gymnastic included, in order to strengthen the body, so that the mind also may be invigorated. If we ever wish to attain to a higher civilization — a loftier, moral and intellectual standard, the first step to be taken is, take

care of the body—secure its health and vigor—nothing can be done to advantage, without a healthy frame. Let the boys and girls then, while engaged in mental efforts, have frequent seasons of out door recreation. What if they should by chance make some noise? So do locomotives, northeasters and old ocean! These sensations on boys and girls are generally the ones that lead off in morals, science, the arts, and in all movements to improve our condition and reform our race.

NATHANIEL BROWN.

Superintending School Committee
